

Citrix Receiver for MAC keyboard language issue

Since version 11.2 of online plugin for MAC some users have problems with a wrong keyboard layout. The reason for that is that since this update the citrix receiver uses the keyboard layout from server and not from the client anymore.

To change this issue you can edit the following config file in your Library on your mac:

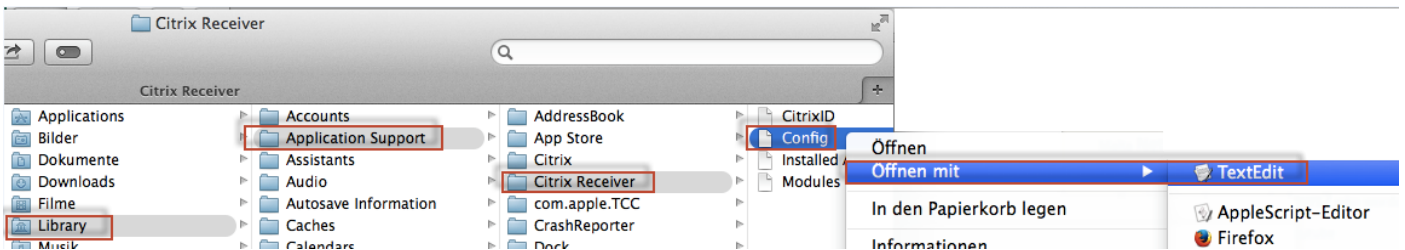

1. Make Library Folder visible if not already done
 - a. Open Terminal → **Navigate to /Applications/Utilities and double-click on Terminal**
 - b. Execute following Command in the Terminal

chflags nohidden ~/Library

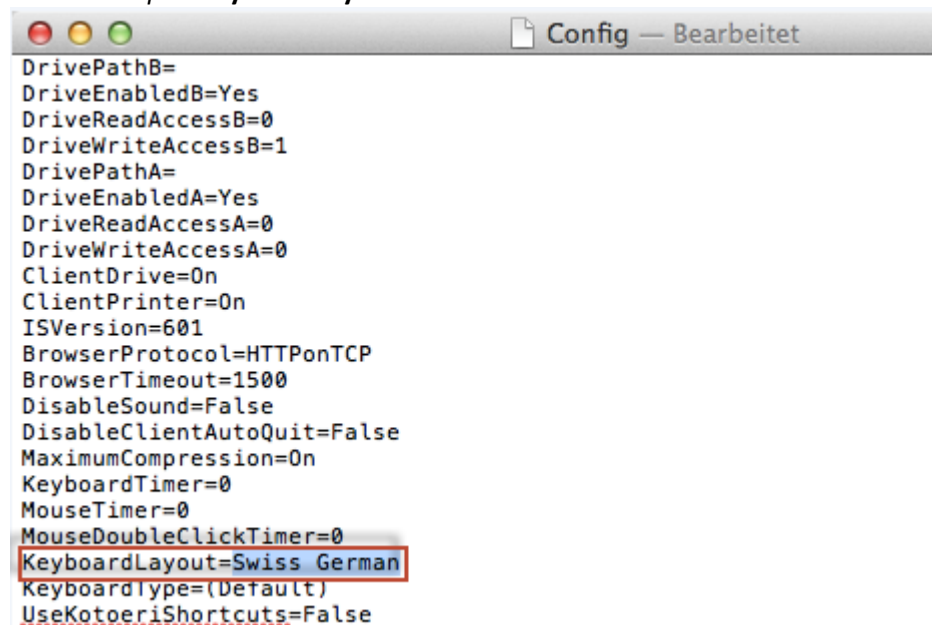

```
sioh — bash — 80x24
Last login: Thu Aug 7 11:10:43 on ttys000
sioh-air:~ sioh$ chflags nohidden ~/Library
```

2. Open within a Finder Window the current users → **Library/Application Support/Citrix Receiver/** folder and open the config with a text editor

3. Change Parameter „KeyboardLayout= to your local Mac Keyboard Layout

As an example: **KeyboardLayout=Swiss German**

```
DrivePathB=
DriveEnabledB=Yes
DriveReadAccessB=0
DriveWriteAccessB=1
DrivePathA=
DriveEnabledA=Yes
DriveReadAccessA=0
DriveWriteAccessA=0
ClientDrive=0n
ClientPrinter=0n
ISVersion=601
BrowserProtocol=HTTPonTCP
BrowserTimeout=1500
DisableSound=False
DisableClientAutoQuit=False
MaximumCompression=0n
KeyboardTimer=0
MouseTimer=0
MouseDoubleClickTimer=0
KeyboardLayout=Swiss German
KeyboardType=(Default)
UseKotoeriShortcuts=False
```

See the list of all supported Keyboard Layouts:
